REQUEST FOR LAND USE BY H&S DIVISION

SYMBOL: HS:JRH

Over the past two years iodine field release studies have been performed in support of the CERT Program at a location south of the intersection of U. S. Highway 20 and Fillmore Boulevard. While this location has been satisfactory for prior tests, there were undesirable aspects. Principally the fact that this area was open to public grazing.

Because of the need for early testing this year, we have searched for and found a 160 acre plot which overcomes the previous difficulties and also possesses other desirable characteristics without introducing any new problems. The area is located 2 miles northeast of CFA on the east side of the Central Monument Road (NE $\frac{1}{4}$ SE $\frac{1}{4}$ Section 30, T3N, R30 E8M). The proposed use of this location will not introduce any radiological hazards to existing or potential facility sites.

I would appreciate early approval of this proposed land useage.
